

Wash Pad System

The Permanent Surface Mounted Wash Pad is a solution to heavy duty environments where a high volume of vehicles needs to be washed.

The wash mat is a surface mounted system which means the operator can avoid excavation or the need to have any items installed below ground. This is ideal for leasehold or sensitive sites such as a multi-storey car park where ground works are not practical. The Washpad can be tailored and designed to your specifications.

Specification

Permitted Weight	Specifically designed to support the weight of the heaviest vehicle or item of plant on the fleet
Designed Weight	Designed to support a max permitted Kg over a determined mm of span and/or the required Kg/m2
Capacity	A determined mm to the required span for the throughput of vehicles and the Kg/m2
Colour	Grey and yellow as standard, however other colours may be available. Ask our sales team when ordering.
Feature	Fibreglass gratings to make a solid liquid containment tray generally 5m x 3M or 6M x 4M (other sizes available)
Maintenance	All gratings removable for ease of servicing maintenance and cleaning
External	Fitted with low profile external raised kerb approx. 100mm high (to prevent accidental damage if vehicles drive off the ramps)
Overall Dimension	5M x 3M or 6M x 4M Standard (other sizes available/as requested)

Morclean Surface Mounted Water Treatment Boxes- Water reclaim systems built to treat waste water

- Step 1** - Select the size/amount of pads needed
