

Morclean Meva Premium

The MEVA PREMIUM vacuums with clever patented filter cleaning technology. Available with the continuous bagging system, 50 litre removable antistatic bags or a 50 litre bagless container. Type H certified with 2 x M class antistatic conical filter cartridges and a Hepa H14 99.995% efficiency down to 0.3 micron filter.

These vacuums are suitable for use in pharmaceutical and other particularly hazardous environments. They can safely collect and bag contaminants without any risk of contact. A well engineered reverse pulsation cleaning method in the first stage filtration system is enabled by a mechanical control. This helps the filters retain a maximum efficiency and does not require additional energy.

All vacuums are supplied with:

- Pressure gauge
- Roller carriage made of sturdy stainless steel
- Electrically conductive casters and wheels
- Alternating filter cleaning system
- Cyclone separator for better pre-separation of dust and other materials
- Extra long 10m cable
- Revolving turn table

Technical Specification:

POWER	Brushless motor ATEX 230V-50-60Hz
NEGATIVE PRESSURE	-230 (max. [mbar])
ATEX MARKING	CEExII3DhExtDA22IP6X T100°C Ta = 0°C to + 30°C for use in Zone 22
ATEX ZONE	22
CONTAINER VOLUME	15-20 litres
PROTECTION CLASS [IP]	65
POWER WATT	1000
PERFORMANCE	210 (max. [m3 / h])
FILTER	M/H
HOSE INLET	38mm
EMPTY WEIGHT	70kg
SOUND PRESSURE LEVEL	Ca. 72 (2 [dB (A)])
LENGTH	840mm
WIDTH	665mm
HEIGHT	1690mm
